Worldwide a.i.f. offices

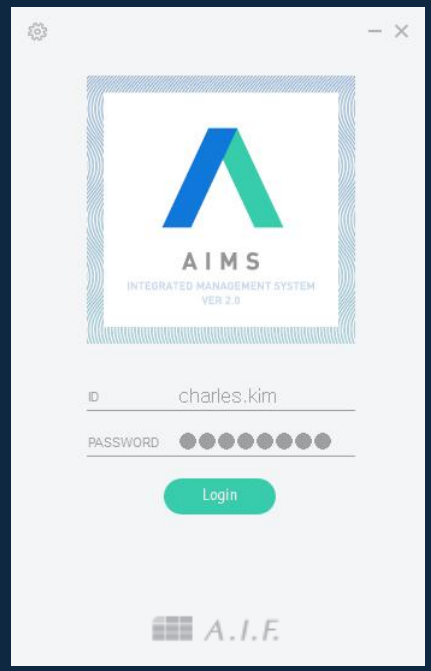

A.I.F.

a.i.f. standard - AIMS

A.I.F. has developed its own ERP system with automation capabilities to provide accurate information to customers, striving to enhance customer satisfaction. After extensive discussions and research, the A.I.F. Email System was developed and seamlessly integrated with our business systems, further improving service quality with innovative features. Additionally, based on cloud servers, enables us to respond swiftly to customer requests from anywhere in the world.

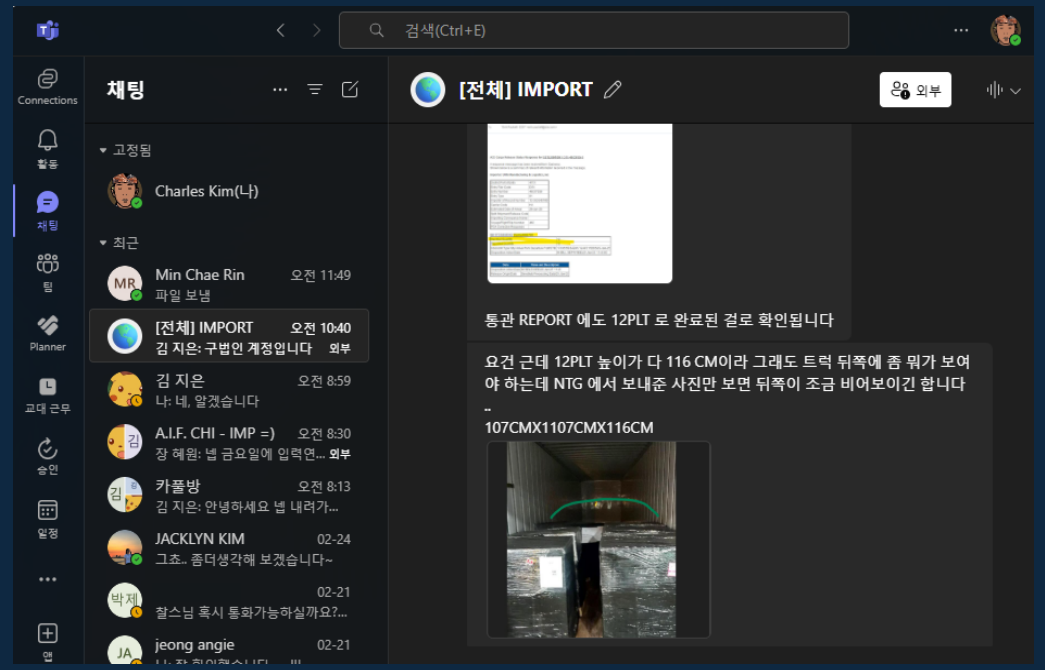

a.i.f. standard - Global 20+ Hour Service

A.I.F.

A.I.F. has established an innovative business system that enables real-time sharing of integrated information from anywhere in the world, allowing seamless operations without time or location constraints. Additionally, by ensuring close connectivity between headquarters and branch offices, we have implemented a Global Workstation that provides continuous CS and Operations support for over 20 hours, delivering faster and more efficient services.

a.i.f. standard - Standard Operating Procedures

A.I.F.

“

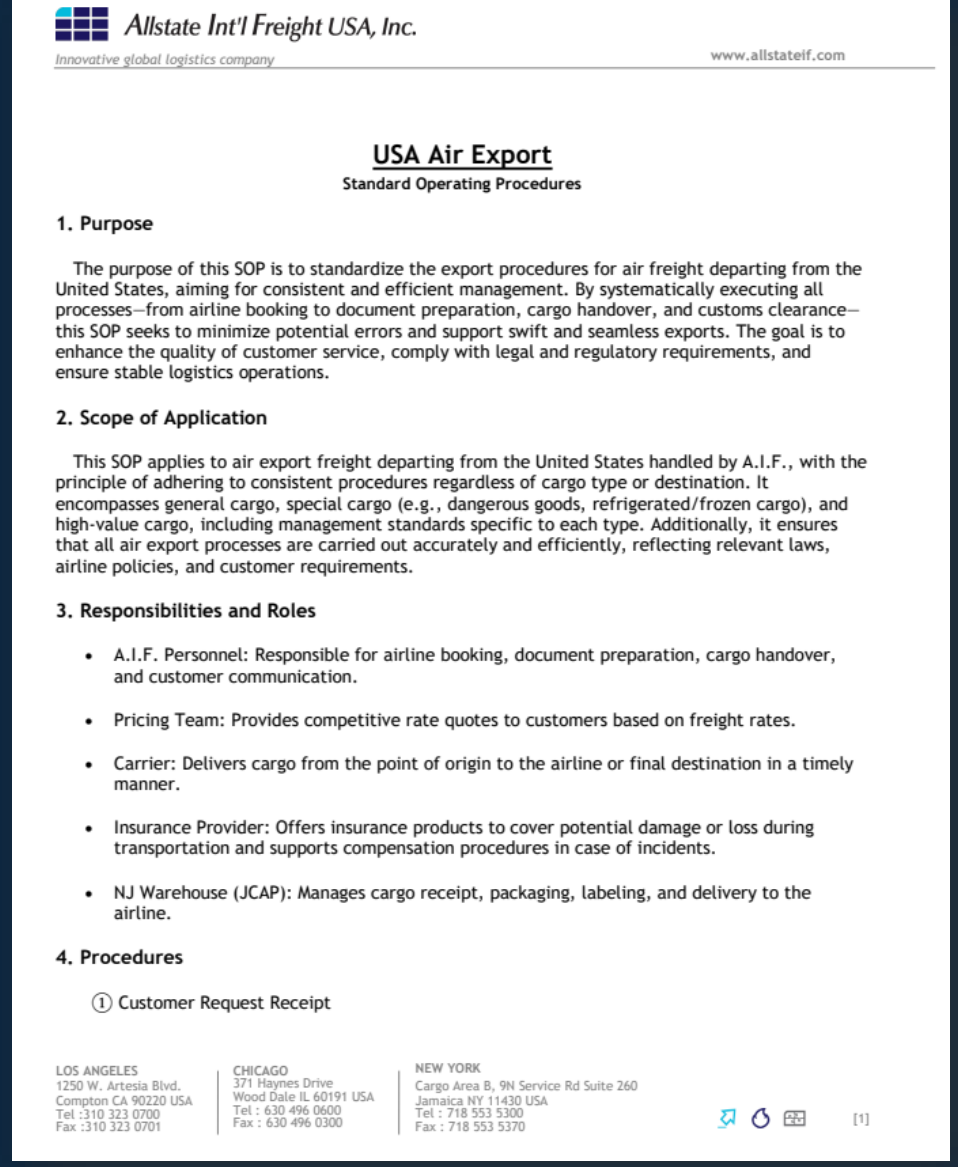

A.I.F. has established standardized work processes that all employees strictly follow. By implementing an ERP system based on SOPs, we have created a foundation for delivering consistently high-quality services.

USA Air Export

Standard Operating Procedures

1. Purpose

The purpose of this SOP is to standardize the export procedures for air freight departing from the United States, aiming for consistent and efficient management. By systematically executing all processes—from airline booking to document preparation, cargo handover, and customs clearance—this SOP seeks to minimize potential errors and support swift and seamless exports. The goal is to enhance the quality of customer service, comply with legal and regulatory requirements, and ensure stable logistics operations.

2. Scope of Application

This SOP applies to air export freight departing from the United States handled by A.I.F., with the principle of adhering to consistent procedures regardless of cargo type or destination. It encompasses general cargo, special cargo (e.g., dangerous goods, refrigerated/frozen cargo), and high-value cargo, including management standards specific to each type. Additionally, it ensures that all air export processes are carried out accurately and efficiently, reflecting relevant laws, airline policies, and customer requirements.

3. Responsibilities and Roles

- A.I.F. Personnel: Responsible for airline booking, document preparation, cargo handover, and customer communication.
- Pricing Team: Provides competitive rate quotes to customers based on freight rates.
- Carrier: Delivers cargo from the point of origin to the airline or final destination in a timely manner.
- Insurance Provider: Offers insurance products to cover potential damage or loss during transportation and supports compensation procedures in case of incidents.
- NJ Warehouse (JCAP): Manages cargo receipt, packaging, labeling, and delivery to the airline.

4. Procedures
